About URBASOFIA

- Urbasofia is a laboratory for urban development, policy design and territorial cohesion focused on developing more integrated, participatory and smart-oriented solutions to pressing urban problems.
- Leveraging on European structural funding for urban innovation, the challenge we are taking up in working with urban authorities was to help them meet actual urban problems with the right tools and fitting flagship projects and piloting actions.
- Our main aim is to bridge the pan-European innovation landscape with the actual beneficiaries and citizens using participatory strategic planning processes, and to shift the paradigm in rethinking cities and regions.

Strategic partnerships

SMART INNOVATIVE LEARNING HUB

Under the aegis of EUSDR International Honorary Chair (CIO-SUERD) and CLDR Association – aggregator of networks and projects, especially in the top areas of territorial development and cooperation, cultural and historical heritage, integrated innovation in various fields (launched in February 2018 in partnership with the Romanian Academy).

Danubian Macroregional Innovation Academy

Platform for the internationalization of education and business designed specifically to solve complex macro-regional societal problems, involve the entire community in seeking more responses oriented towards stability and visionary outlook, and eventually reinforce a new common Danubian identity.

Each territory has equity - a set of assets and territorial capital that can make it competitive compared to other destinations, for either living, or investing, or tourism .... or all of the above!

National Territorial Attractiveness Monitoring Platform (TAMP) indicators for measuring territorial capital attractiveness.

Territorial capital into 2 main categories:
- Behavioural capital (social/ human/ cognitive/ relational capital);
- Physical capital (infrastructural/ environmental/ productive/ settlement capital).

Context and global challenges

- **Resources of territorial capital are scarce** and regularly put at risk by uncontrolled expansion of cities or, on the contrary, by the decrease of population in other areas => major trends of **urban sprawl** or **shrinking cities**;
- Tourism has grown at an accelerated pace over the last few decades and forecasts indicate an ever faster growth rate into the upcoming years => **Touristification** phenomenon increasingly visible;
- One of the richest pillars of the tourism industry lies in the **need and desire to see and learn about different cultural identities**. Cultural heritage is both unique and fragile, it stimulates the story-telling of a place’s history and identity, while it fosters respect and understanding of other cultures.
- Urgent **need for new tools, methods, approaches** for the design and management of complex and dynamic touristic destination. => how to factor in technology, for economic and social returns?
- **Loss of cultural identity** (the phenomenon of degradation faced by most cities in the historical center): how to **recover and valorize place-based identities**?
In the paradigm of smart cities we can found everything, 

How does the smart city trend impacts sustainable tourism?

SUSTAINABLE DEVELOPMENT ⇄ RESILIENT CITIES ⇄ SMART CITIES
• Capability of designing good strategies and operating effective integration (smart governance);
• To manage big data at urban scale and identifying new governance models (who owns the cities?)
• To strengthen participatory planning process through new technologies (e-participation/geoblogs)

It is fundamental that planners and public administrations alike should:
• learn to beware of mass/ unplanned tourism and strive for sustainable tourism development;
• develop cultural heritage as touristic product, while protecting and preserving on a long-term perspective.
Sustainable tourism

A common definition of **sustainable tourism** is the one of the World Tourism Organization (UNWTO): "Sustainable tourism development meets the needs of present tourists and host regions while protecting and enhancing opportunity for the future. It is envisaged as leading to management of all resources in such a way that economic, social, and aesthetic needs can be fulfilled while maintaining **cultural integrity, essential ecological processes, biological diversity, and life support system**."

[WTO 1998: 19]

Sustainable tourism development is: **ECOLOGICALLY SUSTAINABLE, ECONOMICALLY VIABLE**, as well as **ETHICALLY** and **SOCially EQUITABLE**. It respects the fragile environmental balance that characterizes many tourism destinations, particularly in environmentally sensitive areas; and it is based on a long term perspective.

Ingredients for successful sustainable tourism

In order to reach sustainable ways of practicing sustainable tourism through international/interregional collaborations in Danube Region, EUSDR proposes the following set of actions:

- build on cultural diversity as a strength (of the DR);
- enhance cooperation between people of different origins, to encourage creativity and provide a driving force for cultural innovation and economic development, based on heritage, traditions and tourism;
- enhance interconnection and cooperation in education and scientific and research activities for tourism;
- improve planning and infrastructure for tourism;
- support the improvement of the tourism products quality;
- promote cultural exchange in the arts.

UNDERSTANDING CULTURAL HERITAGE

SELECTION

HISTORY
registering selected aspects of the past

MEMORY
common (?) and individual memory about the past

HERITAGE
contemporary use of the past as a product

INTERPRETATION

PAST
everything what happened

REMAINS
things which survived from the past: artefacts, cities, buildings...

Ashworth, G.J. 1994. Guiding the arrow of time into the target of space: heritage planning as the contemporary uses of the past. Groningen.
Instead of conclusions... Recommendations

- Sustainable tourism should leverage on cultural heritage as a magnet for sustainable development and growth.

- Cultural Heritage should be perceived as a contemporary created phenomenon which is constantly recreated by new generations according to multiple interpretations and uses of the past and new trends and attitudes towards the future.

- Recognizing sustainable tourism as a prerequisite for strengthening the cooperation of countries and regions means that CH/NH can become the trigger to create new networks of places and territories which share common values and development patterns.
